Forecast for Wednesday 08 Jun 2022

Weather: Heavy, persistent rain through the early hours giving drenching conditions for a time. Rain soon clearing in the morning then occasional showers and bright spells to follow, the showers locally heavy and thundery with a chance of hail. Turning cloudier through the evening with patchy, mainly light rain spreading east.

Chance of cloud-free hill tops above 800m: 20% at first, increasing to 80% around midday or early afternoon. 40% in the evening decreasing 10% towards midnight.

Low cloud and visibility: Low cloud covering slopes down to 300-500 m through the early hours and morning. Cloud mainly above the summits in the afternoon but bases may briefly cover high peaks in heavy showers. Cloud then lowering onto higher peaks again in the evening. Very poor visibility within cloud otherwise good or very good occasionally poor in heavy showers.

Meteorologist's View

Nothing to add.

Forecast for Thursday 09 Jun 2022

Weather: A cloudy start with some showery rain possible. This is expected to gradually clear towards midday, with a drier, brighter interlude for the afternoon. A further band of cloud and outbreaks of rain will arrive from the west into the evening.

Maximum wind: Southerly to southwesterly mean 20 mph, gusting 30 mph later in the afternoon.

Chance of cloud-free hill tops above 800m: 20% early hours and morning improving to 90% by midday. Likely to lower to 50% in the evening.

Low cloud and visibility: Low cloud may be extensive down to 300-400m at first, but should soon lift and break clearing summits through the morning. Cloud likely to lower onto higher peaks again into the evening. Very poor visibility within cloud otherwise mainly good.

Temperature: **Valleys:** Plus 11 Celsius rising to Plus 16 Celsius.
At 800m: Plus 7 Celsius rising to Plus 10 Celsius.
Freezing level: Above summits.
